

Integro

Yes, we have it.

Integro Training

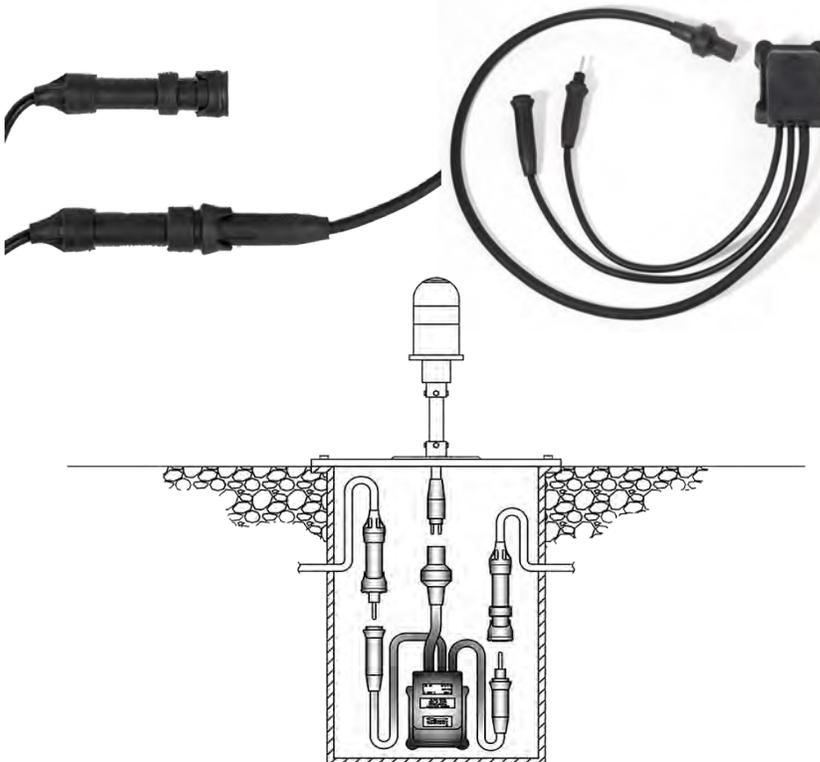

We are currently offering product training on all of our Airfield Lighting products.

The training is a presentation of all of Integro's products, with a demonstration on how to properly install Integro's L-823 Primary Connector Kit, the Complete Kit. Integro supplies samples of the Complete Kit provided with the demonstration so the attendee can install the kit. At the end we provide certification to each attendee.

Who is Integro?

"Integro" comes from the two cornerstones of our business - **Integrity and Growth**. We believe our name effectively represents our strategic intentions.

We manufacture airfield lighting equipment such as isolation transformers, fixture leads and connector kits. We also manufacture equipment used in a broad range of other fields including mining, ship-building, portable power and construction. For more info please visit our website.

Who Should Attend?

- All employees involved in procurement, installation and/or maintenance of airfield lighting equipment.

What is Covered?

- Short Powerpoint presentation to introduce Integro's Airfield Lighting products.
- Demonstration of proper installation of Integro's Complete Kit.
- Certification is awarded to all attendees.

Course Duration:

- 1-2 hours

Course Dates:

- The scheduled training day will be decided upon request.
